## How can I introduce MAP Assessment into my organisation?

There are a number of options, depending on the number of managers to be assessed. These range from working with just one group of managers using DPG as a provider, to the organisation installing and owning the MAP Assessment process. Individuals can now also train to become licensed MAP Assessment Assessors and undertake MAP Assessments all over the UK.

### Option 1 - DPG facilitated programme

This would be a two-day programme consisting of the following:

- Day 1 -** Introduction to MAP Assessment  
Interactive DVD - real life management scenarios  
Full day of assessment
- Overnight -** Scoring the assessment
- Day 2 -** Interpreting the scores  
MAP Assessment competencies  
Management, Personal and Communication styles/values  
Group profile  
Benchmarks – UK, Public & Private Sector national norms  
Individual profiles  
Individual development planning

### Option 2 - Installation of MAP Assessment within an Organisation

This involves training and coaching In-house trainers to deliver the MAP assessment process. DPG would of course support In-house trainers through the learning process and offer telephone and personal support on an ongoing basis.

#### Investment
